About Me

I'm passionate about creating intuitive and immersive digital experiences. With a love for design and storytelling, I aim to bridge the gap between imagination and usability through thoughtful UI/UX work.

My Projects

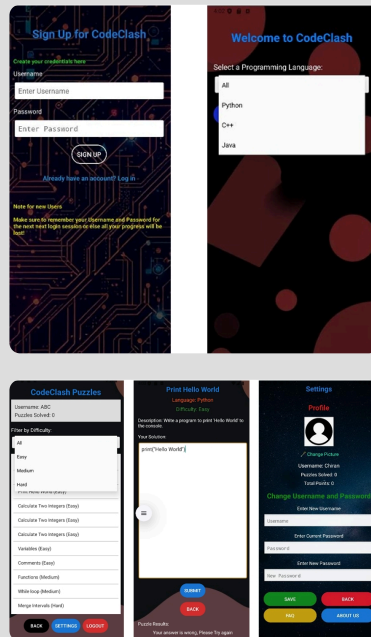

Game-Verse

A Mobile app designed for Gamers with a stylish UI

A modern game aesthetic design for the maximum flow of theme for users. This app allows reviews and guides for games and keeps gamer enthusiasts updated about gaming news.

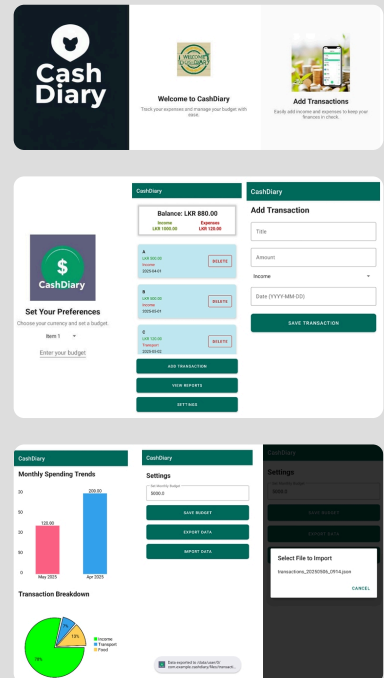

Code-Clash

A Mobile app designed for Coding with programming languages with a simplified UI

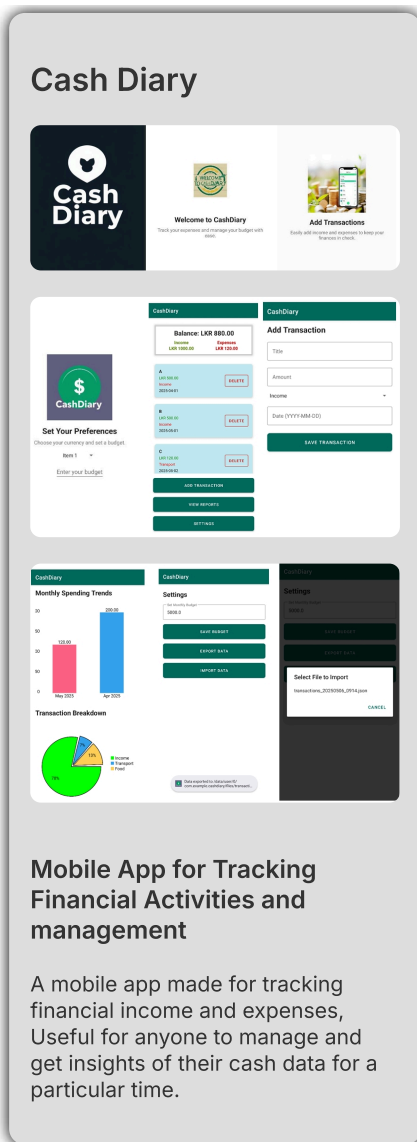

Made for all types of users in different levels of knowledge about programming languages with quiz based learning. So anyone can use this on-the-go to an exam, interview or even for casually practicing.

Cash-Diary

A Mobile app designed for managing Cash with a User-friendly UI

Any user willing to manage their spendings and Income with a helpful app providing insights can use the app even offline.

Mobile App for Tracking Financial Activities and management

A mobile app made for tracking financial income and expenses, Useful for anyone to manage and get insights of their cash data for a particular time.
